**Faites confiance au leader
du marché français !**

Trust the French market leader !

MGI COUTIER SEIM (www.seim.fr) accompagne les plus grands constructeurs mondiaux depuis plus de 60 ans pour leur apporter des solutions fiables et innovantes. Son expertise produit est mondialement reconnue auprès de tous les constructeurs et équipementiers automobiles. Leader sur le marché français, SEIM vous apporte l'ensemble de ses compétences industrielles et techniques pour vous offrir des produits conformes à toutes les plus hautes exigences automobiles.

MGI COUTIER SEIM (www.seim.fr) has been offering to Global Car & Truck Manufacturers for more than 60 years, reliable, innovating and high Value for Money solutions. Both its long, valuable experience and expertise in Cars and Trucks parts production are internationally reknown and appreciated by each and every Car and Truck Makers as well as by System Suppliers. Hence, it enables MGI COUTIER SEIM, the aftermarket division of the MGI COUTIER Group, to leverage this long lasting experience to bring high quality standard for all the product range offered to its IAM distributors.

Le câble d'accélérateur Accelerator cable

Le câble d'accélérateur permet, par l'impulsion du pied sur la pédale, de commander l'accélération du moteur.

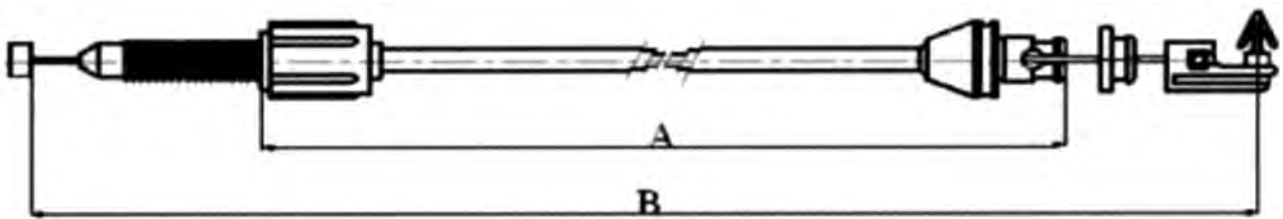

The accelerator cable allows, the pulse of the foot on the pedal, to control the engine throttle

Il existe deux types de câbles d'accélérateur :

There are two types of accelerator cables :

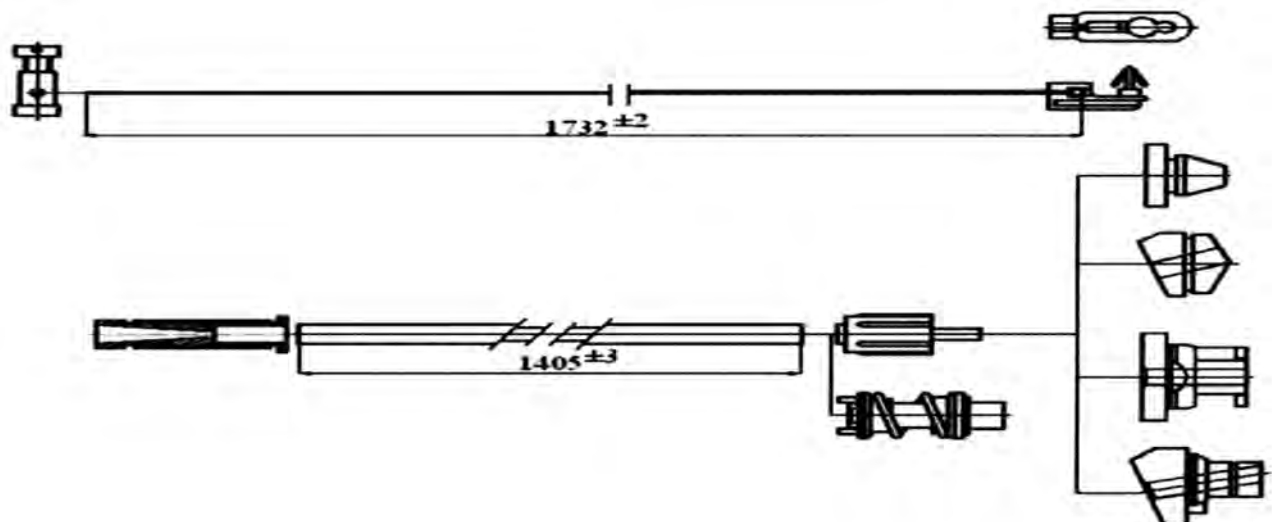

- Le câble spécifique adapté à un véhicule ou à une motorisation.

- *The specific cable for a vehicle or engine.*

- Le kit de câble comprend plusieurs éléments non assemblés, ce qui lui permet de s'adapter à plusieurs véhicules ou motorisations. Une notice de montage est jointe dans l'emballage en cas de kits compliqués.

- *The cable kit comprises several elements not assembled, which allows it to adapt to various vehicles or engines. A manual is included in the package in case of complicated kits.*

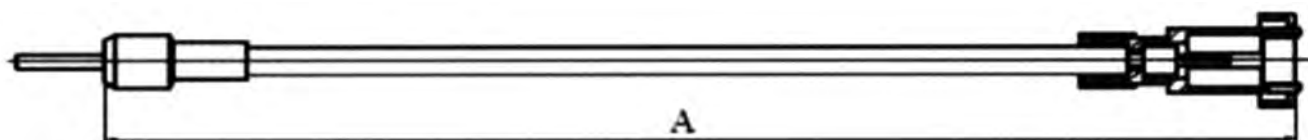

Le câble de compteur Speedometers cable

Le câble de compteur permet de fournir au compteur le nombre de rotations réalisées par la boîte à vitesse afin de calculer la vitesse théorique.

Attention sur certains véhicules les câbles de compteur sont remplacés par des tachymètres électriques.

The speedometer cable provides for the counter the number of rotations made by the gear box in order to calculate the theoretical speed

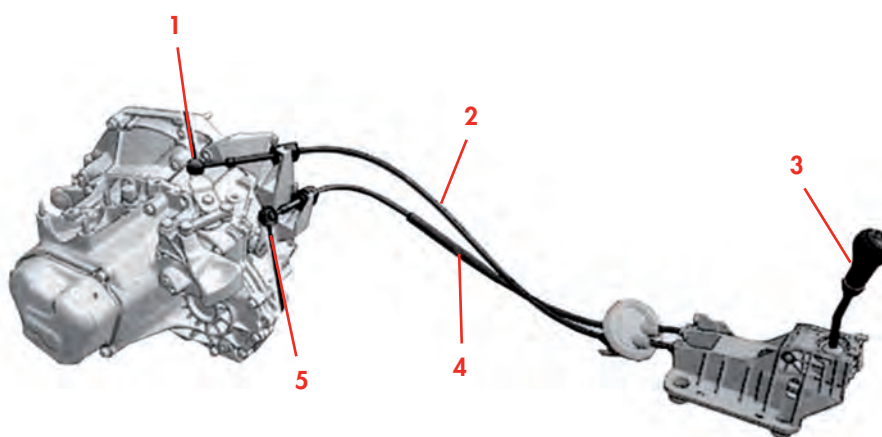

Caution to certain vehicles speedometer cables are replaced by electric speedometers.

Le câble de boîte à vitesse Gear shift cable

- 1 - Rotule de commande de marche arrière
- 2 - Câble de commande de marche arrière
- 3 - Levier de vitesses
- 4 - Câble de commande de sélection de vitesses
- 5 - Rotule de commande de sélection de vitesses

- 1 - Ball joint reverse control
- 2 - Control reverse cable
- 3 - Gear shift lever
- 4 - Gear shift cable
- 5 - Ball joint gear shift

Le câble de boîte à vitesse permet par l'impulsion du levier, d'enclencher les différents rapports de vitesse. C'est un câble spécifique appelé également câble push-pull car il fonctionne en traction et en compression contrairement au câble classique qui ne travaille qu'en traction. Le câble de commande de boîte à vitesse est composé de 2 câbles assemblés ou de deux câbles séparés l'un pour les rapports de marche avant et l'autre pour le rapport de marche arrière.

Gear shift cable allows by the pulse of the lever to engage the different speed ratios. This is a specific cable also called push-pull cable because it works in tension and compression unlike the traditional cable only works in traction. Gear shift cable consists of two cables together or two separate one for the forward gears and one for the reverse gear.

Le câble de débrayage Clutch cable

Le câble de débrayage comme son nom l'indique permet par l'impulsion du pied sur la pédale, de débrayer (désolidariser l'embrayage du volant moteur) pour permettre le changement de rapport de vitesses.

Il existe deux types de câble de débrayage :

- Le câble à rattrapage manuel :

Le réglage de la course se réalise soit en bout de câble, soit en milieu de gaine ou soit en bout de gaine. Il est nécessaire dans le temps de réaliser un nouveau réglage en fonction de l'usure du disque d'embrayage.

- Le câble à rattrapage automatique :

Le réglage de la course se réalise automatiquement et ceci à chaque levée de pédale grâce à un compensateur. Il n'est donc plus nécessaire de réaliser un nouveau réglage en fonction de l'usure du disque d'embrayage.

The clutch cable allows the pulse of the foot on the pedal to disengage (disengage the clutch flywheel) to allowing the change of gear.

There are two types of clutch cables :

- The manual adjusting clutch cable :

The stroke adjustment is carried out either at the end of the cable, either in middle of girdle or either in the end of girdle. It is necessary in the time to make a new setting depending on the wear of the clutch disc.

- The automatic adjusting clutch cable :

The stroke adjustment is performed automatically at each lift and this pedal through a compensator. It is therefore not necessary to make a new setting in depending on the wear of the clutch disc.

Pour ce type de câble il existe trois technologies.

- La première est dite « système à crans ».
- La deuxième est dite « système à billes ».
- Principalement utilisée par Renault et Volkswagen.
- La troisième est dite à « système à galets ».
- Principalement utilisée par Peugeot et Citroën.

Certains câbles à rattrapage automatique sont équipés d'un système de déverrouillage. Ce dispositif doit impérativement être enlevé **après le montage** du câble, ce qui permet de décompresser le compensateur pour que la course du câble s'ajuste automatiquement. Il est tout de même nécessaire d'appuyer plusieurs fois sur la pédale pour l'ajustage.

For this type of cable there are three technologies.

- The first is called « toothed system »
- The second is called « balls system » mainly used on Renault and Volkswagen vehicles.
- The third is called « roller system » mainly used on Peugeot and Citroën vehicles.

Some cables are equipped with an unlocking device. This device must be removed **after the installation** of the cable, which allows, to decompress the compensator so that the cable run is automatically adjusted. It is still necessary to repeatedly press the pedal adjustment.

VERROUILLÉ / LOCKED

DÉVERROUILLÉ / UNLOCKED

Attention
 le dispositif ne doit pas être conservé
 après le montage du câble.

Caution
 device should not be kept
 after the installation of the cable.

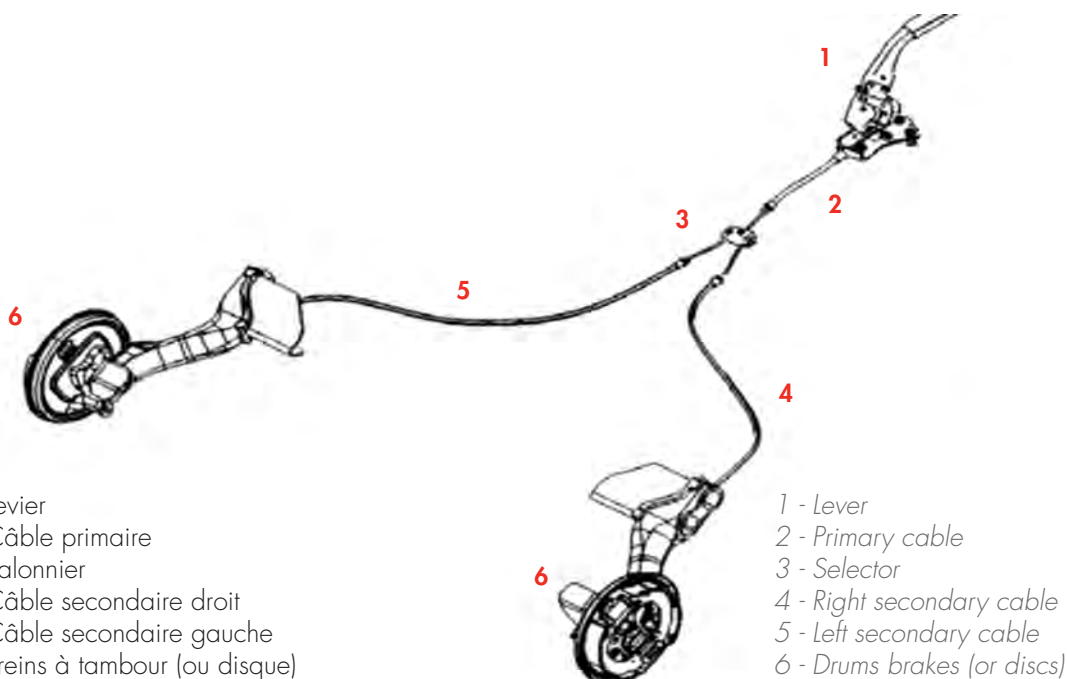

En cas d'ouverture accidentelle avant le montage du câble, le dispositif de verrouillage peut être remis en comprimant le compensateur soit en tirant le câble côté pédale, soit côté boîte à vitesses. Nous vous conseillons d'utiliser un étiau pour bloquer le câble afin d'avoir une main libre pour remonter le dispositif de verrouillage.

In case of accidental opening before installing the cable, the locking device can be reset by pressing the compensator either by pulling the cable in the pedal side or in the gearbox side. We recommend to you to use a vise to secure the cable to have a free hand to raise the locking device.

Le câble de frein manuel Manual brake cable

Le câble de frein permet, par l'action exercée sur le frein à main, d'actionner les freins à tambours ou freins à disques afin d'immobiliser le véhicule.

The brake cable, allows the action exerted by the handbrake, activate the drum brakes or disc brakes to stop the vehicle.

- 1 - Levier
- 2 - Câble primaire
- 3 - Palonnier
- 4 - Câble secondaire droit
- 5 - Câble secondaire gauche
- 6 - Freins à tambour (ou disque)

- 1 - Lever
- 2 - Primary cable
- 3 - Selector
- 4 - Right secondary cable
- 5 - Left secondary cable
- 6 - Drums brakes (or discs)

Généralement le système de câble de freinage dit « frein de parking ou frein de stationnement » se compose de :

Usually the brake cable device called "parking brake" consists of :

- D'un câble de frein primaire relié au frein à main.

- A primary brake cable connected to the handbrake.

De câbles de freins secondaires, reliés ou non au câble de frein primaire. Ils peuvent être composés :

Of secondary brake cables, whether or not related to the primary brake cable. They can be made:

- D'un câble unique articulé à un palonnier

- In a single cable articulated to a brake compensator.

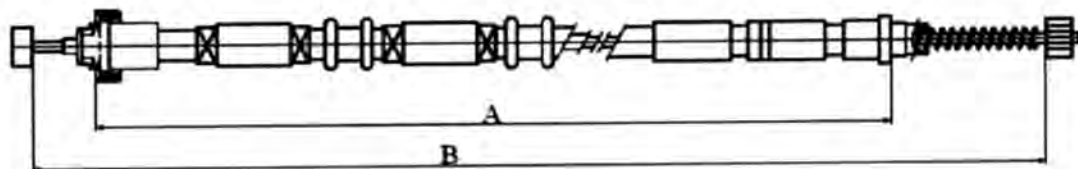

- D'un câble unique sans palonnier

- A single cable without a brake compensator

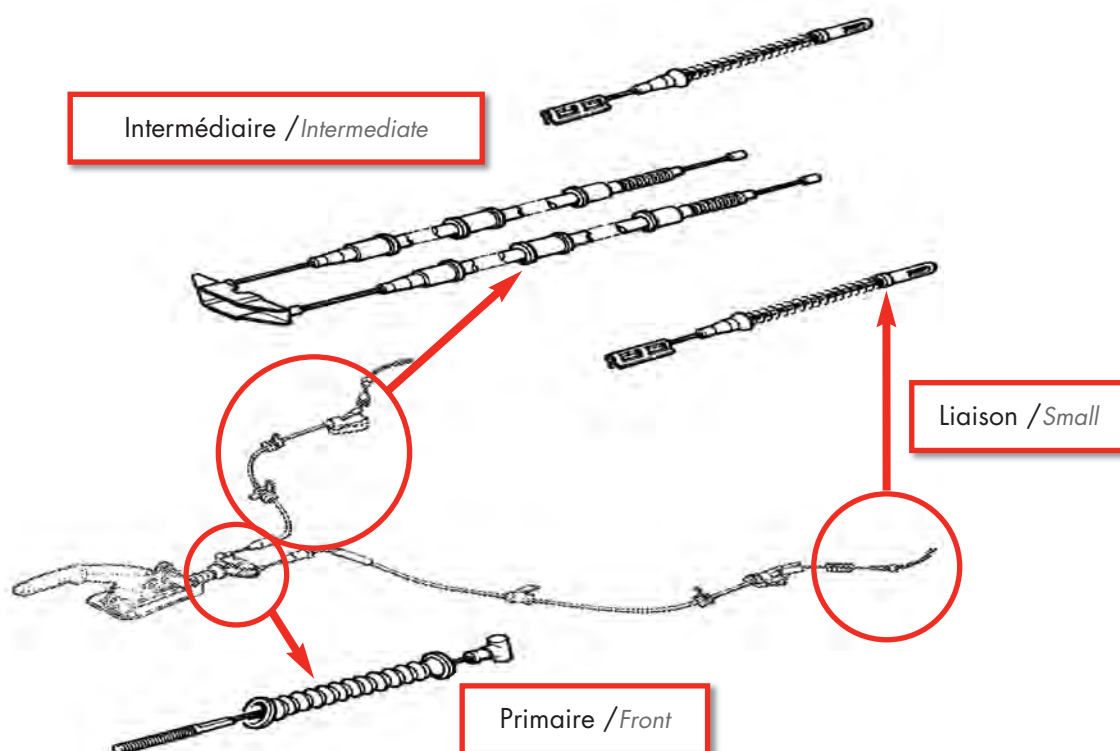

- De deux câbles identiques ou différents côté gauche et côté droit.

- Two identical cables or different cables in left side and in right side.

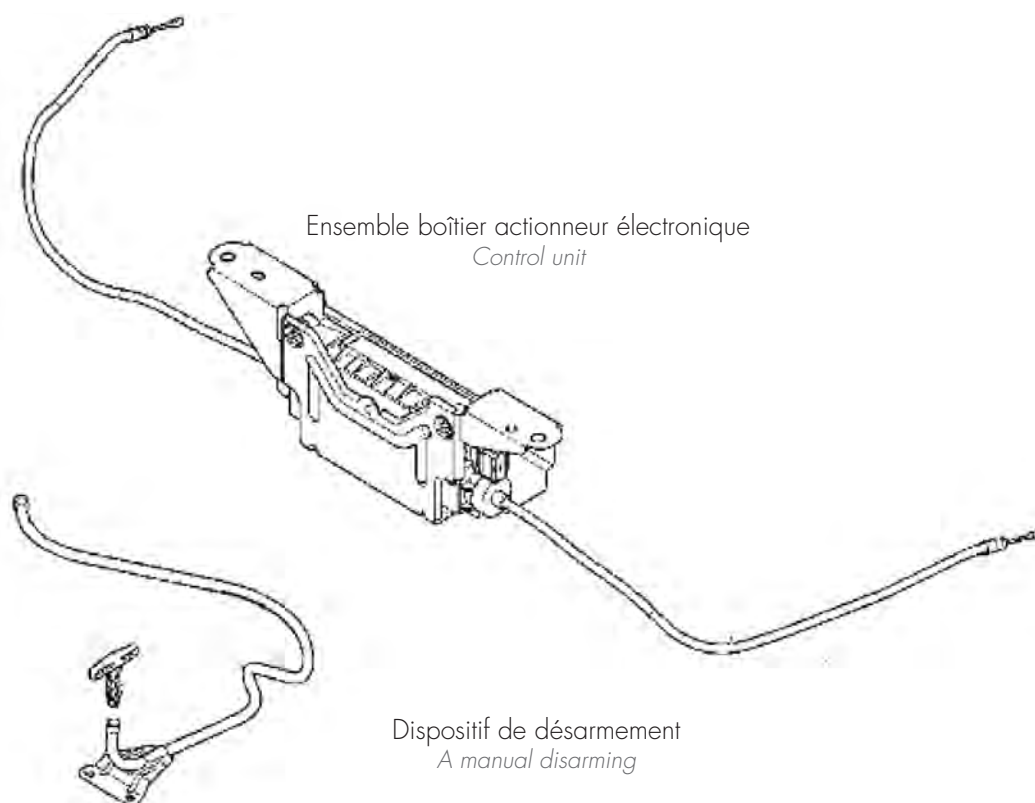

Un câble secondaire unique peut également devenir un câble de frein intermédiaire si un même véhicule est équipé de deux systèmes de freinage. Dans ce cas les constructeurs ajoutent généralement un petit câble dit « câble de liaison » pour pouvoir adapter le câble secondaire au frein à tambours ou au frein à disques.

A single secondary cable may also become an intermediate brake cable even if a vehicle is equipped with two brake devices. In this case manufacturers usually add a small cable says "connection cable" to be able to adapt the secondary cable to the drum brake drum or disc brake.

Le câble de frein automatique Automatic brake cable

Les freins automatiques ou électriques plutôt réservés aux véhicules haut de gamme ont tendance aujourd'hui à se démocratiser sur tous les véhicules de moyenne gamme. Le principe de freinage reste identique, le frein à main est simplement remplacé par un boîtier actionneur électronique situé généralement à l'arrière du véhicule. Un dispositif de désarmement manuel d'urgence est tout de même conservé en cas de défaillance du boîtier électronique. Sur certains véhicules il est possible de changer uniquement les câbles sans changer l'ensemble câble et boîtier électronique. Les références OE utilisées dans notre catalogue correspondent aux références de l'ensemble boîtier. Dans les réseaux constructeurs les câbles utilisés pour les freins de parking automatiques ne sont pas vendus au détail.

Automatic or electric brakes rather reserved for premium vehicles today tend to democratize all mid-range vehicles. The principle remains the same braking; the handbrake is simply replaced by an electronic control unit located generally at the rear of the vehicle. A device for emergency manual disarming is still preserved in the event of failure of the control unit. In some vehicles it is possible to change only the cables without changing the control unit assembly. OE used in this catalog corresponds to the OE control unit. In manufacturer networks, cables used for a car who is equipped by automatic brakes is not sold at retail.

Les n° OPR et n° DAM

SA key help to identify the right part: OPR & DAM id number

DAM : Date d'Application de Modification / *Date of Application Change*

Les N° DAM et OPR sont des repères utilisés par les constructeurs pour connaître la date et le lieu de fabrication d'un véhicule. Ils servent, entre autres, à identifier les pièces de rechange qui correspondent au véhicule.

Le N° OPR est une référence avec 7 caractères qui peut se trouver dans la portière de votre voiture, dans le coffre ou sous le capot (sur la sphère d'amortisseur ou à la base du pare brise). Il contient le n° DAM, les 5 premiers chiffres, suivi de 2 chiffres ou lettres qui correspondent au code usine.

The serial number is a unique code assigned for identification of the place and the date of the vehicle's production. According to these numbers, one can easily identify the right parts which fit to the vehicle. The serial number normally features 7 alphanumeric codes and it can be found on the door panel, alternatively on the trunk panel or under the bonnet (on the shock absorber spring or at the windshield bottom). The first 5 digits are the Modification Application Date and the following 2 numerals or letters identify the factory's place.

Ici le N° **08524FV**
 here **08524FV** code

08524

Indique la date de production
 Features the production date.

FV

Indique le lieu de production
 Features the production place.

Attention : Le n° OPR correspond à la date de fabrication du véhicule et non à la date de 1^{ère} mise en circulation. En effet, il se peut qu'il y ait plusieurs mois de différence, voire une année en fonction du stock des parcs de véhicules. Pour les produits munis d'un n° OPR les dates mentionnées dans notre catalogue correspondent aux dates de fabrication et non aux dates de mise en circulation.

Reminder : This serial number features the production date only and not the initial entry into service date. It may have several months of difference or even a year between these 2 dates. In the next pages and as explained above, whenever an OPR number is shown, please take into account that it mentions the production date.

Les n°PR, n° de châssis et code moteur AUDI, SEAT, SKODA, VW

A key help to identify the right part: AUDI, SEAT, SKODA, VW PR id number, serial number & motor id

Les N° PR, les numéros de châssis et les codes moteur sont des repères utilisés par **AUDI, SEAT, SKODA et VW** pour identifier, de façon fiable, les pièces de rechange qui correspondent au véhicule. Le n° PR et le n° de code moteur sont des références à 3 caractères par contre le n° de châssis est composé de 8 caractères. Toutes ces références sont imprimées sur une étiquette collée dans le coffre et dans le carnet d'entretien de votre voiture.

The PR code, engine code and also the serial number are an unique code assigned by **AUDI, SEAT, SKODA and VW** for identifying the right parts which fit with the vehicle. PR code and also engine code normally feature 3 or 4 alphanumeric codes contrariwise the serial number normally features 8 alphanumeric codes and it can be found on you boot, alternatively in you maintenance booklet.

 Longueur en mm :
 Câble/Gaine
 Length in mm
 Cable/girdle

 Référence d'origine
 OE P/n

Primaire/Front : Câble de frein primaire (relié au frein à main)
Primaire/Front : Primary brake cable (connected to the handbrake)

Intermediate : Câble intermédiaire qui est assemblé entre le câble de frein primaire et les câbles de frein arrière ou les câbles de liaison.

Intermediate : Intermediate cable which is connected between primary brake cables and the rear brake cables or small link cable.

Liaison G/L or D/R : Petit câble qui peut être assemblé aussi bien côté gauche que côté droit au niveau des tambours ou disques de frein. Ce câble est assemblé après le câble intermédiaire.

Liaison G/L or D/R : Small cable that can be assembled as well as left right at the drum or brake disc. This cable is assembled after the intermediate cable.

G/L : Câble de frein côté gauche (côté conducteur)
G/L : Left side brake cable (driver side if left hand drive).

D/R : Câble de frein côté droit (côté passager).
D/R : Left side brake cable (passenger side if left hand drive)

G/L or D/R : Câble de frein qui peut être assemblé aussi bien côté gauche que côté droit.

G/L or D/R : Brake cable which can be connected as well as left right side

Unique/Single : Ensemble de deux câbles coté gauche et coté droit reliés ou non par un palonnier.

Unique/Single : Set of two cables left and right side connected or not by a brake compensator.

Kit G/L et D/R : Ensemble de deux câbles coté gauche et coté droit. Il se peut que les deux câbles soient identiques si la mention « **G/L or D/R** » est présente dans la colonne position.

Kit G/L et D/R : Set of two cables left and right side. It may be that both cables are the same if «G/L or D/R» is present in the position column.

Retour Garantie

Garantie

Tous les produits MGI COUTIER SEIM bénéficient d'une garantie contre tous vices de fabrication pendant une période d'un an à compter de la date de livraison. Cette garantie est limitée au remplacement gratuit ou au remboursement des produits reconnus défectueux par MGI COUTIER SEIM.

Toute demande de garantie pourra être refusée dans les cas suivants :

- Mauvaises conditions de stockage du produit,
- Installation non conforme aux règles de l'art et/ou aux notices.
- Adaptations et/ou modifications du produit.
- Mauvais fonctionnement résultant d'adjonction de pièces ou de dispositifs ne provenant pas de MGI COUTIER SEIM.

Procédure

Pour toute demande de retour garantie il faut impérativement accompagner les produits défectueux avec un formulaire de retour garantie (un par pièce retournée) dûment renseigné. Ce formulaire est disponible auprès de notre service ADV au **Tél. 04 74 46 07 34** ou téléchargeable sur notre site **www.seim.fr**

Il est également possible de contacter le commercial de son secteur pour expertiser les pièces sur place et juger du droit (ou non) à la garantie. En cas de doute, le commercial pourra demander au client d'envoyer son retour, accompagné du formulaire de retour garantie, chez MGI COUTIER SEIM.

Toute demande de retour garantie sans formulaire sera systématiquement refusée par nos services.

Adresse de retour :

**MGI COUTIER SEIM
Service Retour Garantie
Rue de la Gare
01800 VILLIEU**

Après réception des produits en garantie accompagnés du formulaire de retour, le service technique et qualité s'engage à les expertiser et transmettre les résultats au client sous un délai d'un mois. En cas d'acceptation du retour garantie par MGI COUTIER SEIM, le service ADV effectuera un avoir de compensation au client.
