## UN DES LEADERS MONDIAUX DU MANAGEMENT DES FLUIDES ONE OF A GLOBAL LEADERS IN FLUID MANAGEMENT

Le groupe MGI COUTIER accompagne les plus grands constructeurs mondiaux depuis plus de 40 ans pour leur apporter des solutions fiables et innovantes. Le management des fluides représente plus de 82% de son CA (2015).

*MGI COUTIER Group supports the world's leading manufacturers for over 40 years to provide them with reliable and innovative solutions. Its expertise in fluid management activity accounts for over 82% of its turnover (2015).*

Leader sur le marché français, SEIM vous apporte depuis bientôt 70 ans l'ensemble de ses compétences industrielles et techniques pour vous offrir des produits conformes à toutes les plus hautes exigences automobiles.

*Leader on the French market, SEIM brings nearly 70 years since all of its industrial and technical skills to offer products that comply with all the highest automotive requirements.*

## UN MARCHÉ EN PLEINE CROISSANCE A GROWING MARKET

# 2016

Les normes anti-pollution de plus en plus sévères (Euro 4 en 2005, Euro 5 en 2009 et Euro 6 en 2014) poussent les constructeurs à réduire la taille des moteurs (Downsizing) diesel et essence pour limiter la consommation de carburant et les émissions polluantes.

Afin de préserver le même agrément d'utilisation, les moteurs sont équipés d'un système de suralimentation par turbocompresseur.

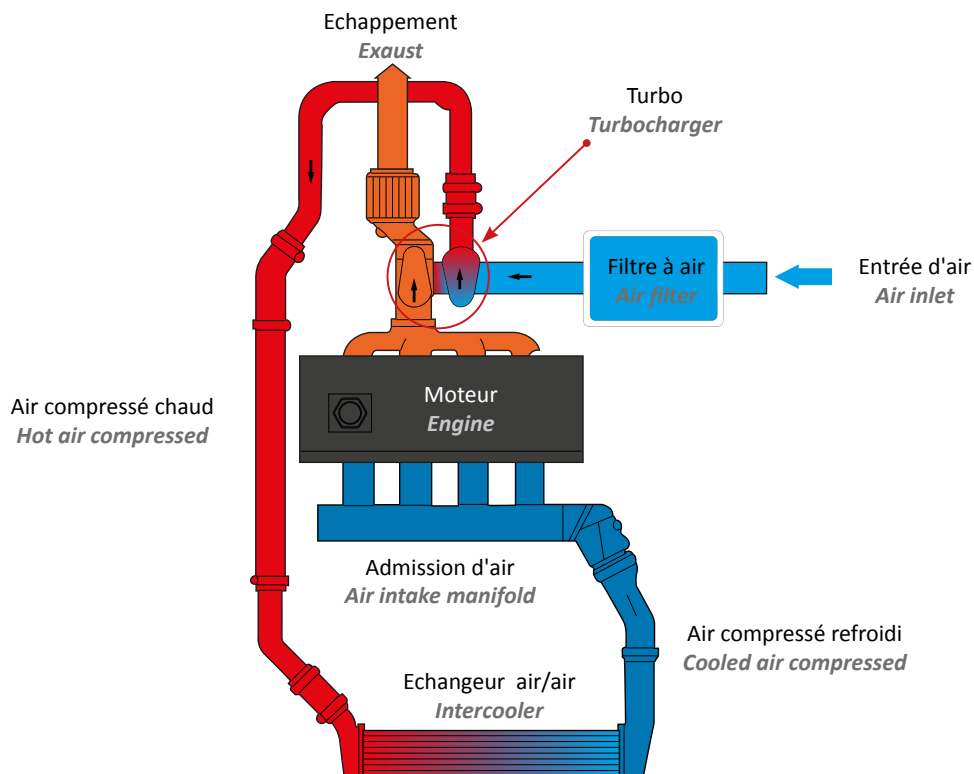

Ce système permet d'augmenter la puissance et le couple d'un moteur. Le % de véhicules neufs suralimentés n'a cessé d'évoluer depuis les normes Euro 4.

*The anti-pollution standards are more and more drastic (Euro 4 in 2005, Euro 5 in 2009 and Euro 6 in 2014) leads manufacturers to downsize diesel and gasoline engines (downsizing) to reduce fuel consumption and polluting emissions.*

*To preserve the same driving enjoyment, the motors are equipped with a turbocharging system.*

*This system improves the power and torque of the engine. The rate of new vehicles supercharged has continued to grow since the application of the Euro 4 standard.*

## PRINCIPE DE FONCTIONNEMENT WORKING PRINCIPLE

Dans un moteur suralimenté, le turbocompresseur est entraîné par les gaz d'échappement et comprime l'air d'admission qui peut atteindre des températures jusqu'à 200 °C.

A cette température l'air de suralimentation a une faible densité ce qui a pour conséquence la formation d'oxyde d'azote et l'augmentation de la tendance au cliquetis sur les moteurs essence. De plus le moteur est soumis à des contraintes thermiques trop fortes. Pour pallier à ces problèmes, l'air de suralimentation est donc refroidi par un échangeur avant d'être envoyé dans la chambre de combustion.

*In a supercharged engine, the turbocharger is driven by exhaust gas and compresses the intake air which can reach temperatures up to 200 °C.*

*At this temperature charge air has a low density which results in the formation of nitrogen oxide and increased tendency to knock on gasoline engines. In addition the engine is subjected to excessive thermal stress. In order to overcome these problems, the charge air is cooled by a heat exchanger before being fed to the combustion chamber*

## PRINCIPAUX SYMPTÔMES DE DÉFAILLANCE MAIN SYMPTOMS OF FAILURE

Témoin moteur allumé et codes défaut indiquant une pression d'admission incorrecte.

*Indicator lit and engine fault codes indicating incorrect inlet pressure.*

Perte de puissance progressive ou immédiate.

*Progressive or immediate loss of power.*

Fumée d'échappement noires ou bleue lors des phases d'accélération.

*Black or blue smoke from exhaust during acceleration phases*

Sifflement anormal lors des phases d'accélération.

*Abnormal whistling during acceleration phases.*

## PRINCIPALES CAUSES DE PANNES MAIN CAUSES OF BREAKDOWNS

Usure liée à un frottement d'un organe mal monté à proximité de la durite.

*Wear due to friction of a badly mounted parts near the hose.*

Serrage excessif des colliers de serrage.

*Overtightening clamps.*

Mauvaise définition produit: température et pression d'utilisation supérieures aux exigences constructeur.

*Bad definition: Really temperature and pressure is bigger than the manufacturer's requirements.*

Problème de fabrication: dimensionnel non conforme.

*Problem of manufacturing : improper dimension.*

Surpression anormale dans le circuit de suralimentation d'air causé par à un capteur de pression défectueux, soupape de décharge (wastegate) défectueuse et ou d'une ligne d'échappement bouchée.

*Abnormal pressure in the air supercharging circuit caused by a defective pressure sensor discharge valve (wastegate) and or exhaust line blocked.*

## Les n° OPR et n° DAM

### A key help to identify the right part: OPR & DAM id number

**DAM:** Date d'Application de Modification / *Date of Application Change*

Les N° DAM et OPR sont des repères utilisés par les constructeurs pour connaître la date et le lieu de fabrication d'un véhicule. Ils servent, entre autres, à identifier les pièces de rechange qui correspondent au véhicule.

Le N° DAM est une référence avec 7 caractères qui peut se trouver dans la portière de votre voiture, dans le coffre ou sous le capot (sur la sphère d'amortisseur ou à la base du pare brise). Il contient le N° OPR, les 5 premiers chiffres, suivi de 2 chiffres ou lettres qui correspondent au code usine.

*The serial number is an unique code assigned for identification of the place and the date of the vehicle's production. According to these numbers, one can easily identify the right parts which fit to the vehicle. The serial number normally features 7 alphanumeric codes and it can be found on the door panel, alternatively on the trunk panel or under the bonnet (on the shock absorber spring or at the windshield bottom). The first 5 digits are the Modification Application Date and the following 2 numerals or letters identify the factory's place.*

Ici le N° **08524FV**  
here **08524FV** code

**08524** : Indique la date de production  
*Features the production date.*

**FV** : Indique le lieu de production  
*Features the production place.*

**Attention** : Le n° OPR correspond à la date de fabrication du véhicule et non à la date de 1ère mise en circulation. En effet, il se peut qu'il y ait plusieurs mois de différence, voire une année en fonction du stock des parcs de véhicules. Pour les produits munis d'un n° OPR les dates mentionnées dans notre catalogue correspondent aux dates de fabrication et non aux dates de mise en circulation.

**Reminder:** *This serial number features the production date only and not the initial entry into service date. It may have several months of difference or even a year between these 2 dates. In the next pages and as explained above, whenever an OPR number is shown, please take into account that it mentions the production date.*

**Les n°PR, n° de châssis et code moteur AUDI, SEAT, SKODA, VW**  
**A key help to identify the right part: AUDI, SEAT, ,VW PR id number, serial number & motor id:**

Les N° PR, les numéros de châssis et les codes moteur sont des repères utilisés par **AUDI, SEAT, SKODA et VW** pour identifier, de façon fiable, les pièces de rechange qui correspondent au véhicule. Le n° PR et le n° de code moteur sont des références à 3 caractères par contre le n° de châssis est composé de 8 caractères. Toutes ces références sont imprimées sur une étiquette collée dans le coffre et dans le carnet d'entretien de votre voiture.

*The PR code, engine code and also the serial number are an unique code assigned by **AUDI, SEAT, SKODA et VW** for identifying the right parts which fit with the vehicle. PR code and also engine code normally feature 3 or 4 alphanumeric codes contrariwise the serial number normally features 8 alphanumeric codes and it can be found on you boot, alternatively in you maintenance booklet.*

# Retour Garantie

## Garantie

Tous les produits MGI COUTIER SEIM bénéficient d'une garantie contre tous vices de fabrication pendant une période d'un an à compter de la date de livraison. Cette garantie est limitée au remplacement gratuit ou au remboursement des produits reconnus défectueux par MGI COUTIER SEIM. Toute demande de garantie pourra être refusée dans les cas suivants :

- Mauvaises conditions de stockage du produit,
- Installation non conforme aux règles de l'art et/ou aux notices,
- Adaptations et/ou modifications du produit,
- Mauvais fonctionnement résultant d'adjonction de pièces ou de dispositifs ne provenant pas de MGI COUTIER SEIM.

## Procédure

Pour toute demande de retour garantie, il faut impérativement accompagner les produits défectueux d'un formulaire de retour garantie (un par pièce retournée) dûment renseigné. Ce formulaire est disponible auprès de notre service ADV au 04 74 46 07 34 ou téléchargeable sur notre site [www.seim.fr](http://www.seim.fr).

Il est également possible de contacter le commercial de son secteur pour expertiser les pièces sur place et jugé du droit (ou non) à la garantie. En cas de doute, le commercial pourra demander au client d'envoyer son retour, accompagné du formulaire de retour garantie, chez MGI COUTIER SEIM.

Toute demande de retour garantie sans formule sera systématiquement refusée par nos services.

Adresse de retour :

MGI COUTIER SEIM  
Service Retour Garantie  
Rue de la Gare  
01800 VILLIEU

Après réception des produits en garantie accompagnés du formulaire de retour, le service technique et qualité s'engage à les expertiser et transmettre les résultats au client sous un délai d'un mois. En cas d'acceptation du retour de garantie par MGI COUTIER SEIM, le service ADV effectuera un avoir de compensation au client.
